ECTOPARASITES AND TREATMENT

Ectoparasites

“Although the term ectoparasites can broadly include blood-sucking arthropods such as mosquitoes (because they are dependent on a blood meal from a human host for their survival), this term is generally used more narrowly to refer to organisms such as ticks, fleas, lice, and mites that attach or burrow into the skin and remain there for relatively long periods (e.g., weeks to months). Arthropods are important in causing diseases in their own right. Still, they are even more important as vectors, or transmitters, of many different pathogens that cause tremendous morbidity and mortality from the diseases they cause.”

-Center for Disease Control

APPROVED TREATMENTS:

PRESCRIPTIONS:

- Aromatodis 100µl
Three (3) droplets per day, with meals
- Ledama 200c
Five (5) Tablets per day, with meals
- Ectogano Solution 2oz
One (1) serving per day
- Ectogano tablet 140mg
Two (2) tablets daily, at wake and before sleep, for six (6) months
